Subject Index to Volume 27

January	pages 1–128	July	pages 1015–1192
February	pages 129–284	August	pages 1193–1304
March	pages 285–448	September	pages 1305–1436
April	pages 449–633	October	pages 1437–1550
May	pages 635–852	November	pages 1551–1674
June	pages 853–1014	December	pages 1675–1822

A

Acanthamoeba keratitis, in soft contact lens wearers, lens disinfection and, 626
Accommodation
  amplitude of, refractive error and, 1187
  dark focus, stability of, after maintained accommodation, 1414
  tonic
    adaptation, darkness and, 820
    diurnal variation, 552
    lag, during adaptation, 820
  vergence, aftereffects, 820
  vergence and, in darkness, 544
Acetylcholine, phosphatidic acid formation by cornea and (rat), 905
Acinar cells, lacrimal gland, Na/K-ATPase in (rat), 1293
Actin
  in cones (teleost fish), 689
  in lens epithelial cells, 1535
  in photoreceptors, immunoferritin localization (animals), D-16
  trabecular cell (monkey), 1305
    cytoskeletal-active drugs and, 1312
  trabecular cell (bovine), 1318
Adaptation, fatigue and structural change in, 538
Adenosine monophosphate, cyclic (cAMP)
  corneal epithelial wound closure and, 8
  dibutyrl, light peak and (cat), 330
  and pigment transport in RPE (teleost fish), 1634
Adenosine triphosphatase, sodium-potassium (Na/K-ATPase)
  hydrogen peroxide and (bovine eye), 103
  in lacrimal acinar cells (rat), 1293
Adenylate cyclase, ciliary process, topical epinephrine and dexamethasone and (rabbit), D-10
Adhesions, focal, of cultured RPE cells, 1622
Adie's syndrome, cell body count in ciliary ganglia, 1428
Adoptive transfer, of experimental autoimmune uveoretinitis, lymphocyte migration in, 611
β-Adrenergic antagonists, ocular administration, therapeutic and systemic side effects (dogs), 401
Adrenergic nerve fibers, iris muscle innervation and (dog), 83
Age/aging
  actin filaments in lens epithelial cells and, 1535
  autofluorescence of lens, 791
  corneal endothelial pump function and, 457
  of lens membrane, MIP26K and, 443
  lens membrane proteins, antibodies to (sheep), 772
  and melanin concentration in RPE, 1063
  at onset of ICE syndrome, estimation of, 873
  pigments in RPE and choroid and, 145
  and refractile bodies in cone inner segment, 708
  retinal capillary basement membrane thickening and (rat), 437
  and retinal pigment epithelial changes in Chédiak-Higashi syndrome (cat), 702
  visual fixation stability and, D-7
Albinism, visual acuity and flash visually evoked cortical potentials in, 222
Albumin, fluorescein isothiocyanate-labeled, for aqueous fluorophotometric monitoring of blood-aqueous barrier, 415
Aldose reductase, in sugar cataract (rat), 1522
Allograft
  cornea, rejection of, T cells and (mouse), 1244
  lymphoma, and anterior chamber immune privilege (mouse), 1235
Amblyopia
  color and luminance discrimination, 1404
  contrast sensitivity in, 532
  grating and recognition acuities, 1148
  monocular optokinetic nystagmus in, 565, 574
  orientation discrimination in, 532
  orientation discrimination and eccentricity, 237
  strabismic, enucleation of fixating eye in (monkey), 246
  therapy, prognostic value of laser interferometric visual acuity in, 273
  visual acuity in, face, grating and recognition stimuli assessment, 1184
Ametropia, amplitude of accommodation in, 1187
Amino groups, free epsilon, in clear lenses and in senile and diabetic cataract, 98
Aminopeptidase, enkephalin hydrolysis in anterior segment and (rabbit), 1300
β-Aminopropionitrile, inhibition of collagen cross-links, post radial keratotomy (rabbit), 1001
Amnion, human, monoclonal antibodies to, reactivity with ocular structures (rabbit), 620
Anaphylotoxins, in aqueous humor, 1288
Angiogenesis. *See also* Neovascularization
  heparin:cortisone pellet and (rabbit), 449
Angiography, fluorescein. *See* Fluorescein angiography
Animal model
  angle closure glaucoma, 396
    secondary, D-12
  effects of ocular administration of β-adrenergic antagonists, 401
  for electrophysiologic study of glaucoma, 378
  enteroviral conjunctivitis, 915
  herpes simplex virus infection, 1447
  herpes simplex virus type-1 latency, 1230

immunogenic granuloma of orbit, 70
newborn herpetic chorioretinitis, 1459
ocular onchocerciasis, 492
Pseudomonas keratitis, 507
retinal neovascularization, 346
trachoma, 64, 615
Aniseikonia, and binocular function, 601
Anterior chamber
fluorescein and fluorescein monoglucuronide in, 966
immune privilege, abrogation of (mouse), 1235
Anterior segment of eye
antibiotic penetration, inflammation and (rat), 958
enkephalin hydrolysis in (rabbit), 1300
inflammation, traumatic, prostaglandins and (rabbit), 1217
Antibiotic therapy, anterior segment penetration, inflammation and (rat), 958
Antibodies, monoclonal. *See* Monoclonal antibodies
Anti-inflammatory agent, nonsteroidal
corticosteroid plus, in keratitis (rabbit), 1226
suprofen, 629
Aqueous humor
anaphylotoxin levels in, 1288
flow
corneal depot vs vitreous depot method of measuring (rabbit), 1331
through microporous filters, resistance (animals), 92
fluorescein and fluorescein monoglucuronide in, 966
herpes simplex virus type 1 in, after virus inoculation into superior cervical ganglion (rabbit), 1447
interphotoreceptor retinoid-binding protein immunoreactivity in (animal), 1041
outflow obstruction/resistance
pigment particles and (monkey), 387
in juxtacanalicular meshwork, D-11
Aqueous outflow network
collagen synthesis in, 5β-dihydrocortisol and (rabbit), D-14
juxtacanalicular meshwork, resistance in, D-11
pigment particles in (monkey), 387
resistance in, aqueous humor and (animals), 92
Arachidonic acid metabolites, biosynthesis by cornea (frog), 898
Arrhythmia, traction on extraocular muscles and, 1160
Arthritis, streptococcal cell wall injection and (rat), 921
Arylsulfatase B, in RPE, in mucopolysaccharidosis VI (cat), 1050
Ascorbic acid (vitamin C), retinal capillary pericyte transport (bovine), 1665
Aspergillus fumigatus, ocular, visualization using fluorescein-labeled lectins, 500
Astrocytes, retinal, shape and distribution (cat), 828
Atrophy
iris, essential. *See* ICE syndrome
retinal, progressive (cat), 1569
Autofluorescence of lens, fluorophotometric measurement, 791
Autoimmune uveoretinitis, experimental
adoptive transfer of, 611
IRPB-induced (rat), 1296
Autoradiography
corneal endothelial repair (rat), 1199
^{3}H-fucose, progressive rod-cone degeneration (dog), 635
melatonin binding in frog retina, 153
Autoregulation of retinal blood flow, D-5
timolol and, D-6

B

Basophils, in conjunctivitis (guinea pig), 1255
Binocular summation, in aniseikonia, 601
Binocularity
cortical, and monocular optokinetic nystagmus, 574
peripheral, and monocular optokinetic nystagmus, 565
Blepharitis, chronic
bacterial lipases and, 486
free fatty acid component of meibomian secretions in, 52
Blindness
stereomotion, 806
vestibulo-ocular reflex in, 1154
Blood-aqueous barrier
aqueous fluorophotometric monitoring, FITC-labeled albumin for, 415
fluorescein permeability, 1107
Blood-brain barrier, sucrose permeability (rat), 1095
Blood flow, retinal
autoregulation, laser Doppler velocimetry, D-5
systemic hypertension and, 722
timolol and, D-6
Blood pressure, retinal blood flow and, 722
Blood-retinal barrier
fluorescein monoglucuronide transport out of vitreous (rabbit), 998
fluorescein permeability, 1107
sucrose permeability (rat), 1095
Bradycardia, traction on extraocular muscles and, 1160
Bruch's membrane
anionic binding sites, in diabetes (rat), D-3
retinal pigment epithelium and, 1615
Bullous keratopathy
aphakic, 480
pseudophakic, 480
β-Bungarotoxin, in generation of enriched population of cultured photoreceptor cells, 656
Butyrate, and R^{II} regulatory subunit, 1420

C

Calpain, degradation of α-crystallin in bovine lens, 1269
Camera, for lens/cataract photography in vivo, 118
Candida albicans, ocular, visualization using fluorescein-labeled lectins, 500
Carbonic anhydrase
inhibitors, transcorneal permeability, ionic vs nonionic diffusion (rabbit), 29
isoenzymes CA I and CA II in human eye, 419
Carboxyfluorescein, transport in RPE (dog), D-17
Cardiovascular system, effects of β-adrenergic antagonists (dog), 401
Cataract
classification, camera for, 118
diabetic, free epsilon-amino groups and 5-hydroxymethylfurfural contents in, 98
disability glare, measurement of, 1131
formation, environmental factors and, 781
galactokinase deficiency and, 429
lens membrane in, 1527
nonenzymatic glycosylation in, 98
radiation, 108
senile, free epsilon-amino groups and 5-hydroxymethylfurfural contents in, 98
sugar, myoinositol and (rat), 1522
water content, freezable and nonfreezable, 122
Catecholamines, and pigment transport in RPE (teleost fish), 634
Cell culture
cellular proliferation in vitreous, 1085
corneal stromal cells, corneal extracts and (rabbit), 14
growth of retinal neurons on flat cells, 296

lens epithelium, glycosaminoglycans production (bovine), 746
retinal capillary pericytes
ascorbic acid transport by (bovine), 1665
glycosaminoglycans production (bovine), 746
retinal pigment epithelium, membrane receptors for RBP, 1031
semi-solid media, for retinoblastoma culture, 1423
Y-79 retinoblastoma cells, improved colony formation, 1423
Cell migration. *See* Wound healing
Ceruloplasmin, serum, in macular degeneration, D-1
Cervical ganglion, superior, herpes simplex virus type-1 inoculation, ocular effects (rabbit), 1447
Chandler's syndrome. *See* ICE syndrome
Chédiak-Higashi syndrome, RPE changes (cat), 702
Chemotaxis
in cultured tyrosine-fed rat corneas, leukocytes and, 926
eosinophil, dimaprit and nordimaprit and (rabbit), 1504
Chlamydia trachomatis. *See* Conjunctivitis, chlamydial; Trachoma
Chloride transport, corneal
keratomileusis and, 1277
leukotrienes and (frog), 898
Chloroethyldeoxyuridine, ocular penetration and efficacy, in herpetic keratouveitis (rabbit), 1453
Cholinergic agonists, and retinol secretion by lacrimal gland (animals), 1261
Cholinergic nerve fibers, iris muscle innervation and (dog), 83
Cholinergic receptors, in rat cornea, 905
Chondroitin sulfate
in interphotoreceptor matrix (rat), 1577
synthesis in vitro by retinal capillary pericytes and lens epithelium (bovine), 746
Choriocapillaris
basal lamina, anionic binding sites in diabetic rat, D-3
endothelial fenestrations, RPE and, 336
polarization of, RPE and (rat), 336
Chorioretinitis, herpetic, virus-infected mononuclear leukocytes in (rabbit), 1459
Choroid, melanin in, 145
Choroidopathy, central serous, visual evoked potential delays in, 214
Chromatography
free fatty acid composition of meibum, in chronic blepharitis, 52
glucose-6-phosphate dehydrogenase deficiency in trabecular meshwork (calf), 992
Chromosome 3, rhodopsin gene, 1170
Chromosome 12, MIP gene, 1351
Ciliary ganglion, cell body counts, 1428
Ciliary processes
carbonic anhydrase isoenzymes in, 419
reactivity of human amnion monoclonal antibodies to (rabbit), 620
Cimetidine, histamine-induced conjunctival eosinophil infiltration and (guinea pig), 1495
Cogan-Reese syndrome. *See* ICE syndrome
Colchicine, effect on trabecular cell cytoskeleton (monkey), 1312
Collagen
cross-linkage inhibition, corneal effects, post radial keratotomy (rabbit), 1001
synthesis
by fibroblastic corneal endothelial cells (rabbit), 891
in rabbit outflow tissue, 5β-dihydrocortisol and, D-14
by RPE cells, 1615
type I, in cornea (chick), 1470
type V, in cornea (chick), 1470
Color vision, in amblyopia, 1404
Complement system, component levels, in aqueous humor, 1288
Con A. *See* Concanavalin A
Concanavalin A, -binding glycoprotein, in corneal epithelium (rat), 1205
Cones. *See* Retina, photoreceptors
Conjunctiva
eosinophil infiltration, ketamine-induced (guinea pig), 1495
epithelium
protein synthesis, prednisolone and cortexolone and, 1005
reactivity of human amnion monoclonal antibodies to (rabbit), 620
hypoxia, in diabetes, 1512
immediate hypersensitivity reaction
eosinophil infiltration and, 1495
histamine in (guinea pig), 57
vasopermeability response, histamine in (guinea pig), 57
Conjunctivitis
chlamydial
immune mechanism in (monkey), 615
T-cell response in (monkey), 64
enteroviral (rabbit), 915
giant papillary, basophil hypersensitivity in, 1255
vernal, basophil hypersensitivity in, 1255
Contact lens
corneal deswelling after overnight wear, hard vs hydrogel extended wear lenses, 20
for electroretinography, 372
extended wear, corneal deswelling after overnight wear, 20
hard, corneal deswelling after overnight wear, 20
for posterior vitreous photodisruption, 947
soft, disinfection systems, *Acanthamoeba* keratitis and, 626
Contrast sensitivity
in amblyopia, 532, 1404
as measure of disability glare, 1131
post enucleation of fixating eye, in strabismic amblyopia (monkey), 246
suprathreshold response in multiple sclerosis and optic neuritis, 1368
Copper, serum, in macular degeneration, D-1
Cornea
arachidonic acid metabolism (frog), 898
basement membrane components, 604
carbonic anhydrase isoenzymes in, 419
chloride transport in, leukotrienes and (frog), 898
collagen types I and V in (chick), 1470
cyclosporin A penetration, 519
deswelling after overnight contact lens wear, hard vs hydrogel extended wear lenses, 20
edema, polymorphonuclear leukocytes in (guinea pig), 1466
effects of collagen cross-link inhibitors after radial keratotomy (rabbit), 1001
endothelial cell modulation by polymorphonuclear leukocyte into fibroblasts (rabbit), 891
endothelium
cell shape and prostaglandin E_2 (rabbit), 1437
development, postnatal (animals), 44
dysfunction, freeze-fracture study, 480
effects of preservatives in ophthalmic drugs, 525
epidermal growth factor and (rabbit), 474
growth characteristics in vitro (baboon), 607
healing rate, topical retinoic acid and (rabbit), 1193
in ICE syndrome, 853
nonregenerating, sodium hyaluronate effect (cat), 1485
permeability to fluorescein, 24
pump function, aging and, 457
repair (rat), 1199
sodium flux, pH and (rabbit), 1274

epithelium
class I HLA antigen expression by, laser densitometric analysis, 883
healing, Con A- and WGA-binding glycoproteins, 1205
ion transport following myopic keratomileusis (rabbit), 1277
protein synthesis
prednisolone and cortexolone and, 1005
during wound healing, 1
reactivity of human amnion monoclonal antibodies to (rabbit), 620
thromboxane synthesis, interleukin-1 and (rabbit), 1543
wound closure, tissue culture assay, 8
extracts, corneal stromal cell growth in culture (rabbit), 14
fluorescein and fluorescein monoglucuronide in, 966
fluorescein monoglucuronide diffusion coefficient and distribution ratio in (rabbit), 24
Fuchs' endothelial dystrophy, 480
fungi in, fluorescein-labeled lectins for visualization of, 500
herpes virus infection, arachidonic acid metabolism to eicosanoids in (rabbit), 1443
inflammation. *See also* Keratitis
suprofen therapy and, 629
lectin binding sites, localization, 1280
macular dystrophy, stromal glycoconjugates in, 1211
nerve development, positional specificity (chick), 38
puncture of, inflammation following, prostaglandins and (rabbit), 1217
response to *Pseudomonas aeruginosa* (rat), 507
stromal cell culture, corneal extracts and (rabbit), 14
sulfonamide penetration of, ionic vs nonionic diffusion (rabbit), 29
transplantation. *See* Transplantation, corneal
vascularization, heparin:cortisone pellet and (rabbit), 449
wounds, connective tissue remodeling in, 1478
Cortexolone, and protein synthesis in ocular surface epithelium, 1005
Corticosteroids, nonsteroidal anti-inflammatory drug plus, in keratitis (rabbit), 1226
Cortisone, heparin plus, corneal vascularization and (rabbit), 449
Coupling, intercellular, in rat lens culture, 755
Cross-correlation analysis, dark accommodation and dark vergence, 544
α-Crystallin, calpain degradation of, in bovine lens, 1269
Cyclosporin A, topical, pharmacokinetics, 519
Cysteine proteinase, calcium-dependent. *See* Calpain
Cytochalasin B, effect on trabecular cell cytoskeleton (monkey), 1312
Cytosine arabinoside, and ocular cell proliferation in vitro, 1010
Cytoskeleton
cone (teleost fish), 689
retinal pigment epithelial cell, iodoacetic acid and (chick), 1068
trabecular cell (bovine), 1318
trabecular cell (monkey), 1305
cytoskeletal-active drugs and, 1312

D

Dark adaptation, in infants, pupillary changes during, D-8
Dark dissociation, accommodation and vergence in, 544
Dark focus. *See* Accommodation
Darkness, accommodation aftereffects and, 820
Deconvolution methods, for data analysis in vitreous fluorophotometry, 406
2-Deoxycytidine, and cytosine arabinoside inhibition of ocular cell proliferation in vitro, 1010
Descemet's membrane, in ICE syndrome, 873
Desensitization, to topical epinephrine, dexamethasone and (rabbit), D-10
Dexamethasone
glaucoma filtering surgery and (rabbit), D-13
response of intraocular pressure and ciliary process β-adrenergic-sensitive adenylate cyclase activity to topical epinephrine and (rabbit), D-10
Diabetes mellitus
anionic binding sites in Bruch's membrane and (rat), D-3
conjunctival hypoxia in, 1512
fast axonally transported proteins in optic nerves in (rabbit), 1115
lens autofluorescence in, fluorometric measurement, 791
retinal and uveal pericytes in (rat), 716
and sucrose permeability of blood-retinal barrier (rat), 1095
Diabetic retinopathy
capillary pericyte transport of ascorbate, 1665
proliferative, hypoxic theory of, 1512
5β-Dihydrocortisol, and collagen synthesis in rabbit outflow tissue, D-14
Dimaprit, eosinophil chemotaxis and anterior uveitis from (rabbit), 1504
Dipeptidyl peptidase, enkephalin hydrolysis in anterior segment and (rabbit), 1300
Disinfection, for soft contact lenses, *Acanthamoeba* keratitis and, 626
Docosahexaenoic acid, in rod outer segment during light damage (rat), 727
Docosapentaenoic acid, in photoreceptor outer segment (rabbit), 261
Dopamine, influence on light peak (cat), 330
Drug therapy
resistance to, 1546
subconjunctival injection, preservative-induced changes in corneal endothelium (rabbit), 525
Drusen, pathogenesis (monkey), 184
Drusenoid bodies, in retinal pigment epithelium, in Chédiak-Higashi syndrome (cat), 702
Dry eye, artificial tear infusion pump for, 1284

E

Eccentricity, orientation discrimination and, 237
Edema, corneal, polymorphonuclear leukocytes in (guinea pig), 1466
Eicosanoids, in herpesvirus infected cornea (rabbit), 1443
Electron microscopy
corneal endothelium in ICE syndrome, 853
Descemet's membrane in ICE syndrome, 873
fibronectin localization in RPE (rat), 840
giant cells in senile macular degeneration, 364
immunocytochemistry, interstitial retinoid-binding protein in retina (vertebrates), 679
iron transformation and cytotoxicity in siderosis bulbi, 226
opsin localization in photoreceptor inner segments and ciliary plasma membrane (mouse), 836
pathogenesis of drusen (monkey), 184
progressive retinal atrophy (cat), 1569
scanning (SEM)
corneal epithelial wound closure (rabbit), 464
glio-vascular architecture in rabbit retina, 1602
tunicamycin-induced dysgenesis of rod outer segment membrane (toad), 1587
subretinal neovascularization (monkey), 204
transmission (TEM), glio-vascular architecture in rabbit retina, 1602
Electrophoresis
disc-gel, glucose-6-phosphate dehydrogenase in trabecular meshwork (calf), 992
gel, two-dimensional, RPE cell surface proteins (rat), 136

Electroretinography (ERG)
cone, oscillatory potentials, 270
contact lenses and retinal illumination for, 372
DC, hypoxia and (cat), 1385
flash, in unilateral experimental glaucoma, 378
focal, in evaluation of macular function, 1123
full-field, in progressive rod-cone degeneration (poodle), 1179
light damage in developing retina (albino rat), 164
pattern, in unilateral experimental glaucoma, 378
phosphodiesterase inhibitors (cat), 1395
rod
diurnal rhythm and cyclic lighting, 268
oscillatory potentials, 270
Emmetropia, amplitude of accommodation in, 1187
Endophthalmitis
anaerobic bacterial (rabbit), 115
bacterial, sterile endophthalmitis vs, intravitreal glucose and (rabbit), 1541
Enkephalins, hydrolysis in anterior segment (rabbit), 1300
Enterovirus type 70, conjunctivitis (rabbit), 915
Enucleation, of fixating eye, in strabismic amblyopia (monkey), 246
Environmental factors, in cataractogenesis, 781
Enzyme immunoassay, streptococcal peptidoglycan-polysaccharide, 921
Enzyme-linked immunosorbentassay (ELISA)
for interphotoreceptor retinoid-binding protein (animals), 1041
monoclonal antibody to uveal melanoma, 1362
tear immunoglobulins, 622
Eosinophil
chemotaxis, dimaprit and nordimaprit and (rabbit), 1504
conjunctival infiltration, histamine and immediate hypersensitivity and (guinea pig), 1495
in conjunctivitis (guinea pig), 1255
Epidermal growth factor (EGF)
corneal endothelial cell shape and (rabbit), 1437
effect on corneal endothelium (rabbit), 474
Epinephrine
tissue response to, vanadate and, 1336
topical, desensitization to, dexamethasone and (rabbit), D-10
ERG. *See* Electroretinography
Extracellular matrix
production by RPE, 1615
retinal microvasculature, 194
Eyelid suturing, eye growth and (chick), 255

F

Fatty acids
free, in meibomian gland secretions, in chronic blepharitis, 52
photoreceptor outer segment (rabbit), 261
Ferritin, intraocular, 226
Fibrin, in corneal basement membrane, 604
Fibrinogen, in corneal basement membranes, 604
Fibroblasts
corneal endothelial cell modulation into (rabbit), 891
herpes simplex virus type 1 replication in (mouse), 909
scleral, proliferation in vitro, cytosine arabinoside and, 1010
Fibronectin
production by RPE cells, 1615
in retinal pigment epithelium, immunocytochemical localization (rat), 840
Field defects, for vergence eye movements, 806
Filaments, intermediate
in cones (teleost fish), 689
in retina and retinoblastoma, 1075
trabecular cell (monkey), 1305
cytoskeleton-active drugs and, 1312
trabecular cell (bovine), 1318
Fixation stability, aging and, D-7
Fluorescein
in human eye, 966
intravenous, pharmacokinetics, 1107
transport in RPE (dog), D-17
Fluorescein angiography, subretinal neovascularization
fluorescein leak (monkey), 204
involution, 1644
Fluorescein monoglucuronide
diffusion coefficient and distribution ratio in cornea (rabbit), 24
in human eye, 966
intravenous, pharmacokinetics, 1107
transport out of vitreous (rabbit), 998
Fluorography, fast axonally transported protein in optic nerves of diabetic rabbit, 1115
Fluorophotometry
aqueous, of blood-aqueous barrier, FTIC-labeled albumin for, 415
aqueous flow (rabbit), 1331
fluorescein and fluorescein monoglucuronide in human eye, 966
fluorescein and fluorescein monoglucuronide pharmacokinetics, 1107
lens autofluorescence, 791
vitreous, data analysis by deconvolution, 406
Fluoropyrimidines, in ocular cicatricial disease (animals), 940
Fluorouracil, anticontractile effects (animals), 940
Foreign bodies, iron, cytotoxicity, 226
Fourier analysis, dark accommodation and dark vergence, 544
Fovea, superficial capillaries relation to, D-4
Freeze-fracture study
corneal endothelial dysfunction, 480
rod outer segment dysgenesis (toad), 1595
Fuch's endothelial dystrophy, endothelial dysfunction, 480
Fungus infection, rapid visualization of common fungi using fluorescein-conjugated lectins, 500
Fusarium solani, ocular, visualization using fluorescein-conjugated lectins, 500
Fusobacterium necrophorum endophthalmitis (rabbit), 115

G

Galactokinase deficiency, cataracts and, 429
Gamma aminobutyric acid, immunoreactivity in retina (animals), 674
Ganglion cells, R-cognin in, during retinogenesis (chick), 323
Ganzfeld electroretinography, contact lens for, 372
Genetic factors
heterozygotes for galactokinase deficiency, 429
MIP gene assignment to chromosome 12, 1351
rhodopsin gene assignment to chromosome 3, 1170
Gentamicin, intravitreal liposome-encapsulated, pharmacokinetics (rabbit), 1103
Geographic atrophy, 364
Giant cells, in senile macular degeneration, 364
Glare, disability, contrast sensitivity and, 1131
Glaucoma
angle-closure
animal model, 396
secondary, animal model, D-12
electrophysiologic study, animal model, 378
experimental, unilateral, pattern and flash ERG in, 378
filtering surgery, dexamethasone and D-penicillamine and (rabbit), D-13

open angle, β-adrenergic antagonists for, therapeutic and systemic effects (dog), 401
pattern reversal retinal potential in, D-9
pigmentary, pigment particle obstruction of aqueous outflow in (monkey), 387
Glial fibrillary acidic protein
in retina and retinoblastoma, 1075
retinal astrocytes (cat), 828
Glucocorticoids
activity in outflow tissue, 5β-dihydrocortisol potentiation of (rabbit), D-14
and protein synthesis in ocular surface epithelium, 1005
Glucose, intravitreal, in bacterial vs sterile endophthalmitis (rabbit), 1541
Glucose-6-phosphate dehydrogenase, trabecular meshwork (calf), 992
Glycoconjugates
in cornea, lectin-binding studies, 1280
in macular corneal dystrophy, 1211
Glycoproteins
Con A- and WGA-binding, in corneal epithelium (rat), 1205
110 K dalton, during corneal epithelial wound healing, 1
in normal cornea and keratoconus, 604
Glycosaminoglycans, in vitro production by retinal capillary pericytes and lens epithelium (bovine), 746
Glycosylation, nonenzymatic, in cataracts, 98
Granuloma, orbital, T cells in (rat), 70
Grating acuity, in amblyopia, 1148, 1184
Growth and development
arch vision-degrading device and (chick), 981
corneal endothelium (animals), 44
corneal nerves (chick), 38
flat cells as substrate for retinal neuron growth and fiber formation (chick), 296, 307
growth characteristics of corneal endothelium in vitro (baboon), 607
photoperiod and lid suturing effects (chick), 255
R-cognin during retinogenesis (chick), 323

H

Haparan sulfate, synthesis in vitro by retinal capillary pericytes and lens epithelium (bovine), 746
Healon. *See* Sodium hyaluronate
Hemodynamics, retina, D-5
timolol and, D-6
Hemorrhage, retinal thresholds for Nd:YAG laser exposure (monkey), 1176
Heparin, cortisone plus, corneal vascularization and (rabbit), 449
Herpes simplex virus
keratitis. *See* Keratitis, herpetic
latency in murine ocular tissues, 77
type 1
iododeoxyuridine-resistant isolates, thymidine kinase activity of, 1546
latency, murine iontophoresis reactivation model, 1230
in ocular tissue after inoculation into superior cervical ganglion (rabbit), 1447
replication in fibroblasts (mouse), 909
type 2, chorioretinitis of newborn (rabbit), 1459
Herpesvirus, corneal infection, arachidonic acid metabolism to eicosanoids in (rabbit), 1443
Histamine
conjunctival vasopermeability and (guinea pig), 57
eosinophil chemotaxis and, 1504
-induced conjunctival eosinophil infiltration (guinea pig), 1495
Histochemistry, spatial heterogeneity in interphotoreceptor matrix (rat), 1577
HLA antigens, class I, from corneal epithelium, laser densitometric analysis, 883
Horseradish peroxidase, in evaluation of misdirection hypothesis of oculomotor synkineses following oculomotor nerve injury (cat), 975
Horseradish peroxidase/trypsin technique, in retinal vascular study, 434
Hydrogel lens, corneal deswelling after overnight wear of, 20
Hydrogen peroxide, Na/K-ATPase and (bovine eye), 103
12-Hydroxyeicosatetraenoic acid, in herpes infected cornea (rabbit), 1443
5-Hydroxymethylfurfural, in clear lenses and in senile and diabetic cataract, 98
Hypercalcemia, vitamin D_2-induced, in lens (rat), 447
Hyperopia, amplitude of accommodation in, 1187
Hypersensitivity
delayed-type
in anterior chamber-associated immune deviation, 1235
in corneal allograft rejection (mouse), 1244
immediate, conjunctival
eosinophil infiltration (guinea pig), 1495
histamine in (guinea pig), 57
Hypertension
ocular, pattern reversal retinal potential in, D-9
systemic, retinal blood flow and, 722
Hypoxia
conjunctival, in diabetes, 1512
and DC electroretinogram (cat), 1385
HZE particles, lenticular effects (rat), 108

I

ICE syndrome
age at onset, estimation of, 873
corneal endothelium in, 853
Descemet's membrane in, 873
Ileum, response to epinephrine, vanadate and (rabbit), 1336
Immediate hypersensitivity reaction. *See* Hypersensitivity, immediate
Immune privilege, of anterior chamber, abrogation of (mouse), 1235
Immune system
in metastatic disease from intraocular tumors (mouse), 1355
in *Pseudomonas* keratitis (rat), 507
Immunity, cellular
in chlamydial eye infection (monkey), 64, 615
in ocular onchocerciasis (monkey), 492
in orbital granuloma (rat), 70
in retinitis pigmentosa, 356
in trachoma (monkey), 64
Immunization, against *P. aeruginosa* and *S. marcescens* keratitis (rabbit), 932
Immunocytochemistry
actin in photoreceptors (animals), D-16
electron microscopic, interstitial retinoid-binding protein in retina (vertebrates), 679
fibronectin localization in RPE (rat), 840
interstitial retinoid-binding protein
distribution, 1041
in rod cells and pinealocytes (monkey), 844
Na/K-ATPase in lacrimal acinar cells (rat), 1293
opsin localization in inner segment and ciliary plasma membrane of photoreceptor (mouse), 836
retinal somatostatin (rabbit), 316
retinoid-binding protein in cone-dominated retinas, 1015

Immunoelectron microscopy, corneal collagen (chick), 1470
Immunofluorescence
basement membrane components of normal cornea and keratoconus, 604
extracellular matrix of retinal microvasculature, 194
Immunoglobulins, in tears, enzyme-linked immunosorbentassay, 622
Immunohistochemistry
extracellular matrix production by RPE, 1615
gamma aminobutyric acid immunoreactivity in retina (animals), 674
VIP-like immunoreactive ocular nerves (animals), 951
Indomethacin, corneal endothelial cell shape and (rabbit), 1437
Inflammation, ocular
in experimental myopia (chick), 981
suprofen therapy, 629
traumatic, of anterior segment, prostaglandins and (rabbit), 1217
Insulin receptors, of retinal microvasculature, vs receptors in nonvascular retinal tissue (bovine), D-2
Interferon
production by T lymphocytes, in retinitis pigmentosa, 356
in tears, after enterovirus type 70 infection, 915
Interleukin-1, thromboxane synthesis and, in corneal epithelial cells (rabbit), 1543
Interleukin-2
and lymphoma allograft abrogation of anterior chamber immune privilege (mouse), 1235
production by lymphocytes in retinitis pigmentosa, 356
Interphotoreceptor matrix, 129
spatial heterogeneity of components (rat), 1577
Intraocular lens, Nd:YAG laser damage to, damage thresholds, 795
Intraocular pressure
aqueous humor flow measurement and, 1331
corneal puncture and, prostaglandins and (rabbit), 1217
reduction of, β-adrenergic antagonists (dog), 401
retinal blood flow and, laser Doppler velocimetry, D-5
topical epinephrine and dexamethasone and (rabbit), D-10
Iodoacetic acid, RPE cell cytoskeleton and (chick), 1068
5'-Iododeoxyuridine, resistance of HSV-1 isolates to, thymidine kinase and, 156
IRBP. *See* Retinoid-binding protein
Iris
atrophy, essential. *See* ICE syndrome
dilator muscle, innervation (dog), 83
response to epinephrine, vanadate and, 1336
sphincter muscle, innervation (dog), 83
Iritis, herpes simplex virus, chloroethyldeoxyuridine in (rabbit), 1453
Iron, cytotoxicity and transformation in siderosis bulbi, 226
Isoenzymes, carbonic anhydrase, in human eye, 419

J

Juxtacanalicular meshwork
aqueous humor flow, 92
flow resistance in, D-11

K

Kainic acid, in generation of enriched population of cultured photoreceptor cells, 656
Karhumen-Loeve expansion, analysis of VEPs, in multiple sclerosis, 1379
Keratectomy, epithelial ion transport in cornea after (rabbit), 1277
Keratitis
Acanthamoeba, in soft contact lens wearers, lens disinfection and, 626
herpetic
chloroethyldeoxyuridine in (rabbit), 1453
in inbred mice, 77
Pseudomonas
immunization against (rabbit), 932
in rat, 507
Serratia marcescens, immunization against (rabbit), 932
suprofen and prednisolone acetate in (rabbit), 1226
Keratoconjunctivitis, meibomian, free fatty acid composition of meibum in, 52
Keratoconjunctivitis sicca, artificial tear infusion pump for, 1284
Keratoconus, basement membrane components, 604
Keratocytes, fibroblastic corneal endothelial cells vs (rabbit), 891
Keratomileusis, epithelial ion transport in cornea after (rabbit), 1277
Keratopathy, tyrosine, leukocytes in (rat), 926
Keratoplasty, penetrating, endothelial cell loss and, sodium hyaluronate and (cat), 1485
Keratotomy, radial, corneal effects of collagen cross-linkage inhibition after (rabbit), 1001

L

Lacrimal gland
acinar cells, Na/K-ATPase in (rat), 1293
retinol secretion by (animals), 1261
Lag of accommodation, darkness and, B20
Laminin, in Bruch's membrane and surrounding RPE cells, 1615
Laser densitometry, class I HLA antigen expression by corneal epithelium, 883
Laser Doppler velocimetry
bidirectional, retinal blood flow, D-6
retinal blood flow, D-5, D-6
response to systemic hypertension, 722
Laser interferometry, pretherapy assessment of visual acuity in amblyopia, prognostic value, 273
Laser ophthalmoscope, scanning, in retinal localization of scotoma and fixation area, 1137
Laser optometry, accommodative, dark focus stability, 1414
Laser photodisruption, contact lens for, 947
Lectins. *See also* Concanavalin A; Wheat germ agglutinin
binding to pseudoexfoliative material and ocular zonules, 1516
binding sites in cornea, localization of, 1280
fluorescein-labeled, for visualization of ocular fungi, 500
Lens of eye
autofluorescence, measurement of, 791
calpain degradation of α-crystallins in (bovine), 1269
carbonic anhydrase isoenzymes in, 419
culture, MIP and intercellular coupling domains (rat), 755
epithelial cells
actin filaments in, 1535
in vitro production of glycosaminoglycans (bovine), 746
epithelium, subcapsular, reactivity of human amnion monoclonal antibodies to (rabbit), 620
fibers, aging of (sheep), 772
free epsilon-amino groups and 5-hydroxymethylfurfural contents in, 98
galactose-exposed, myoinositol in (rat), 1522
H_2O_2-modification of Na/K-ATPase in (bovine), 103
hypercalcemia, vitamin D_2-induced (rat), 447
HZE particle effects (rat), 108
main intrinsic polypeptide, in cultured rat lens, 755
major intrinsic protein, gene mapping, 1351
membrane, aging and MIP26K and, 443
membrane interlocking domains in (sheep), 1527
membrane proteins, aging, antibodies to (sheep), 772

photography, camera for, 118
water content, freezable vs nonfreezable, 122
Letter to editor, 632
Leukocytes
mononuclear, HSV-2 in, chorioretinitis and, 1459
polymorphonuclear
corneal edema and (guinea pig), 1466
in keratitis, suprofen and prednisolone acetate and (rabbit), 1226
modulation of endothelial cells into fibroblasts (rabbit), 891
nonsteroidal anti-inflammatory agents and, 629
in *Pseudomonas* keratitis (rat), 507
in tyrosine keratopathy (rat), 926
Leukotrienes, chloride transport in cornea and (frog), 898
Light exposure
retinal damage, in albino rat, 164
rod outer segment deterioration and, polyunsaturated fatty acids and vitamin E in (rat), 727
Light microscopy
focal adhesions of RPE cells, 1622
retinal superficial capillaries and the fovea, D-4
Light peak, dopamine influence on (cat), 330
Lipase, bacterial, and chronic blepharitis, 486
Lipid peroxidation, and light-induced photoreceptor damage (rat), 727
Lipofuscin, in retinal pigment epithelium, 145
in Chediak-Higashi syndrome (cat), 702
Liposomes, encapsulation of gentamicin, 1103
Lymphocytes
in adoptive transfer of experimental autoimmune uveoretinitis, 611
T. *See* T lymphocytes
Lymphokines, in retinitis pigmentosa, 356
Lymphoma, T-cell, allografts, and immune privilege in anterior chamber (mouse), 1235

M

Macrophage, in senile macular degeneration, 364
Macrophthalmos, photoperiod and lid suturing and (chick), 255
Macula, retinal
degeneration
senile, giant cells in, 364
serum ceruloplasmin in, D-1
disease, VEP in, 214
function, assessment, focal ERG in, 1123
melanin in, 1063
pattern evoked retinal response after nerve fiber lesions (monkey), 734
scotoma, and reading ability, 1137
Main intrinsic polypeptide (MIP), in cultured rat lens, 755
Major intrinsic protein of lens, gene mapping, 1351
Meibomian glands, secretions, in chronic blepharitis, FFA in, 52
Meibomitis, bacterial lipases and, 486
Meibum, free fatty acid composition, in chronic blepharitis, 52
Melanin
in choroid, 145
in retinal pigment epithelium, 145
regional variation and aging and, 1063
Melanoma, malignant
intraocular, metastasis of, natural killer cells in (mouse), 516
uveal, monoclonal antibodies to, 1362
Melatonin, binding in retina (frog), 153
Metastatic disease
from intraocular melanoma, natural killer cells in (mouse), 516
from intraocular tumors, immune response to (mouse), 1355
Microfilaments, RPE, iodoacetic acid and, 1068
Microtubules
in cones (teleost fish), 689
RPE, iodoacetic acid effects (chick), 1068
trabecular cell (monkey), 1305
cytoskeleton-active drugs and, 1312
trabecular cell (bovine), 1318
MIP26K, and aging of human lens membrane, 443
Monoclonal antibodies
to aging lens membrane proteins (sheep), 772
collagen, 1470
to human amnion, reactivity to ocular structures (rabbit), 620
50-1B11, cone outer segment binding (vertebrates), 831
to uveal melanoma, 1362
Morphology
apical, OOA experimental myopia (chick), 981
Morphometry, corneal endothelium in ICE syndrome, 853
Movements of eye
perception of motion in depth, 584
pursuit, in stutterers, 1410
saccades
periaqueductal gray matter activity and (monkey), 1165
in stutterers, 1410
vergence. *See* Vergence
Mucopolysaccharidosis VI, RPE arylsulfatase B activity (cat), 1050
Müller cells, retinal flat cells and, 296, 307
Multiple sclerosis
suprathreshold response in, 1368
visual evoked potentials in, time domain and, 1379
Muscles
extraocular
aging and, D-7
traction (stretch), oculocardiac reflex and, 1160
iris, innervation (dog), 83
Mycosis. *See* Fungus infection
Myoinositol, in galactose-exposed lens (rat), 1522
Myopia
amplitude of accommodation in, 1187
experimental, morphologic analysis (chick), 981

N

Natural killer (NK) cells, in intraocular melanoma metastases (mouse), 516
Nd:YAG laser
damage threshold, for intraocular lens, 795
posterior vitreous photodisruption, contact lens for, 947
retinal hemorrhage thresholds (monkey), 1176
Neovascularization
retinal pigment epithelium, in retinal dystrophy (rat), 336, 346
retinovitreal, in retinal dystrophy (rat), 346
subretinal
involution of, retinal pigment epithelium in (monkey), 1644
ultrastructure (monkey), 204
Nerves
adrenergic nerve fibers, iris muscle innervation and (dog), 83
cholinergic nerve fibers, iris muscle innervation and (dog), 83
corneal, development of, positional specificity (chick), 38
optic. *See* Optic nerve
vasoactive intestinal polypeptide and (animals), 951

and progressive rod-cone degeneration in poodles, 1179
rod ERG diurnal rhythm in, 268
Retinoblastoma
intermediate filaments in, 1075
WERI cells, colony formation in culture, media and, 1423
Y-79 cells
colony formation in culture, media and, 1423
differentiation into pigment epithelial-like cells, D-15
regulatory subunit of type II cAMP-dependent protein kinase in, 1420
Retinoic acid, topical, corneal endothelial healing and (rabbit), 1193
Retinoid-binding protein
interphotoreceptor (interstitial) (IRBP)
in cone-dominant retinas (squirrel), 1015
immunization, uveoretinitis and pinealitis from (rat), 1296
in retina, electron microscopic localization (vertebrates), 679
in rod photoreceptors and pineal gland (monkey), 844
in subretinal fluid, 1027
tissue distribution in various animals, 1041
membrane receptors for, in retinal pigment epithelium, 1031
Retinol, in tears, lacrimal gland secretion and (animals), 1261
Retinol-binding protein. *See* Retinoid-binding protein
Rhodopsin
gene mapping, 1170
phosphorylation
by dissociated rod photoreceptors (mouse), 285
in retinal degeneration (mouse), 264
RS-52367, ocular administration, therapeutic and systemic side effects (dog), 401

S

Saccades. *See* Movements of eye
Scar formation, fluoropyrimidines and (animals), 940
Sclera, wounds, connective tissue remodeling in, 1478
Sclerostomy, patency, D-penicillamine and dexamethasone and (rabbit), D-13
Scotoma, macular, reading ability and, 1137
Serratia marcescens keratitis, immunization against (rabbit), 932
Sialoglycoconjugates, in interphotoreceptor matrix (rat), 1577
Siderosis bulbi, transformation and cytotoxicity of iron in, 226
Siderosomes, 226
Silicone intraocular lens, Nd:YAG laser damage thresholds, 795
Snellen notation, infants' acuity, 1417
Sodium
flux, across corneal endothelium, pH and (rabbit), 1274
transport, in corneal epithelium, following keratomileusis, 1277
Sodium bisulfite, corneal endothelial effects (rabbit), 525
Sodium hyaluronate (Healon), effect on nonregenerating corneal endothelium (cat), 1485
Somatostatin, in retina (rabbit), 316
Sorbinol, myoinositol accumulation in galactose-exposed lens and (rat), 1522
Spectral sensitivity, post enucleation of fixating eye in strabismic amblyopia (monkey), 246
Specular microscopy, corneal endothelium, postnatal development, 44
Speech disorders, stuttering, eye movements in, 1410
Staphylococcal lipases, and chronic blepharitis, 486
Staphylococcus aureus, ocular infection, antibiotic penetration of anterior segment and (rat), 958
Stereoacuity
in children, 598
perception of motion in depth, 584
Stereomotion perception, visual fields for, 806
Stereopsis
in children, 598
deficient
monocular optokinetic nystagmus in, 565
optokinetic nystagmus in, 574
visual field defects, 806
Stiles-Crawford function, occlusion and, 441
Streptococci, peptidoglycan-polysaccharide complexes, uveitis and arthritis (rat), 921
Stuttering. *See* Speech disorders
Subretinal fluid
IRBP in, 1027
resorption
in cat, 1560
quantitative estimation (rabbit), 1564
Sucrose, permeability of blood-retinal and blood-brain barriers (rat), 1095
Sulfonamides, transcorneal permeability, ionic vs nonionic diffusion (rabbit), 29
Suprofen
prednisolone acetate plus, in keratitis (rabbit), 1226
topical, bioavailability and corneal anti-inflammatory effect (rabbit), 628
Syneresis, and lens opacification, 122
Synkinesis, oculomotor, 975

T

Taxol, effect on trabecular cell cytoskeleton (monkey), 1312
T cell. *See* T lymphocyte
Tears
artificial, infusion pump delivery system, 1284
herpes simplex virus type 1 in, virus inoculation of superior cervical ganglion and (rabbit), 1447
immunoglobulins in, enzyme-linked immunosorbent assay, 622
retinol in, lacrimal gland secretion and (animals), 1261
Temperature, environmental, cataractogenesis and, 781
Thromboxane synthesis, in corneal epithelial cells, interleukin-1 and (rabbit), 1543
Thymidine kinase activity, in iododeoxyuridine-resistant HSV-1 isolates, 1546
Timolol, ocular administration, therapeutic and systemic side effects (dog), 401
Tissue culture
corneal endothelial cells, epidermal growth factor effects (rabbit), 474
corneal epithelial wound closure, 8

generation of enriched population of cultured photoreceptor cells, 656
growth characteristics of corneal endothelial cells (baboon), 607
lens, MIP and intercellular coupling domains in (rat), 755
retinal pigment epithelium
arylsulfatase activity in mucopolysaccharidosis VI (cat), 1050
cell-substratum adhesions, 1622
iodoacetic acid effect on cellular cytoskeleton and adhesions, 1068
T lymphocytes
in corneal allograft rejection (mouse), 1244
cytotoxic, in corneal allograft rejection (mouse), 1244
in immune rejection of metastases from intraocular tumor (mouse), 1355
in orbital granuloma (rat), 70
in retinitis pigmentosa, 356
suppressor, in chlamydial eye infection (monkey), 64, 615
Trabecular meshwork
glucose-6-phosphate dehydrogenase in (calf), 992
pigment deposition in, aqueous outflow and (monkey), 387
trabecular cell cytoskeleton, 1305, 1312, 1318
Trachoma
immune mechanisms in (monkey), 615
local inflammatory response, immunohistochemical study (monkey), 64
Transplantation, corneal
allograft rejection, T cells in (mouse), 1244
HLA antigen expression by corneal epithelium, analysis, 883
Tumor, intraocular, meatastasis from, immune rejection of (mouse), 1355
Tunicamycin-induced dysgenesis, rod outer segment membrane (toad)
freeze-fracture analysis, 1595
scanning electron microscopy, 1587
Tyrosinemia II, corneal inflammation in, 926

U

Ultrastructure. *See* Electron microscopy
Ultraviolet radiation, cataractogenesis and, 781
Uvea/uveal tract
capillary pericytes, in diabetes (rat), 716
melanoma, monoclonal antibodies to, 1362
Uveitis
anterior, dimaprit and nordimaprit and (rabbit), 1504
systemic injection of streptococcal cell wall and (rat), 921
Uveoretinitis, experimental autoimmune
adoptive transfer, lymphocyte migration in, 611
IRBP-induced (rat), 1296

V

Vaccination. *See* Immunization
Vagus nerve, oculocardiac reflex and, 1160
Vanadate, modulation of adrenergic processes, 1336
Vas deferens, response to epinephrine, vanadate and (guinea pig), 1336
Vasoactive intestinal polypeptide (VIP)
ocular innervation and (animals), 951
and retinol secretion by lacrimal gland (animals), 1261
Vergence
accommodation and, in darkness, 544
disparity, quantitative assessment, 558
perception of motion in depth, 584
visual field defects, 806

Vimentin, in retina and retinoblastoma, 1075
Vinculin, iodoacetic acid and, 1068
Vision
aftereffects in adaptation, 538
binocular
aniseikonia and, 601
in children, 598
perception of motion in depth, 584
fixation stability, age and, D-7
Visual acuity
in albinism, 222
in amblyopia, assessment, 1184
of infants, at 20 feet, 1417
laser interferometric assessment in amblyopia therapy, prognostic value, 273
Visual evoked cortical potential, in albinism, 222
Visual evoked potential (VEP)
delays, in central serous choroidopathy, 214
time domain analysis, in multiple sclerosis, 1379
Visual evoked response, pattern reversal, in study of aniseikonia and binocular function, 601
Visual field
defects. *See* Field defects
interocular difference, 799
Vitreoretinopathy, proliferative, fluoropyrimidine therapy (animals), 940
Vitreous
cellular proliferation, in vitro model, 1085
fluorescein monoglucuronide egress from (rabbit), 998
fluorophotometry, data analysis by deconvolution, 406
fungi in, fluorescein-labeled lectins for visualization of, 500
neovascularization, in retinal dystrophy (rat), 346
photodisruption, contact lens for, 947
Vitreous humor
glucose in, in bacterial vs sterile endophthalmitis (rabbit), 1541
IRBP immunoreactivity in (animals), 1041
Vitamin A. *See also* Retinoid-binding protein; Retinol
metabolism and transport, RPE and, 1031
Vitamin D_2, hypercalcemia, in lens (rat), 447
Vitamin E, in rod outer segment during light damage (rat), 727

W

Water, in lens of eye, freezable vs nonfreezable content, 122
WGA. *See* Wheat germ agglutinin
Wheat germ agglutinin
-binding glycoprotein, in corneal epithelium (rat), 1205
binding to lens membrane "ball and socket" regions (sheep), 1527
Wound healing
cornea
connective tissue remodeling, 1478
endothelium, topical retinoic acid and (rabbit), 1193
epithelium
Con A- and WGA-binding glycoproteins in (rat), 1205
protein synthesis during, 1
in rabbit, 464
tissue culture assay of wound closure, 8
sclera, connective tissue remodeling, 1478

Z

Zonules, lectin binding to pseudoexfoliative material in, 1516
